

Presentation schedule (as of December 2, 2024)		
13:00	Keynote Sanjeev Goyal	Network Interventions
14:00	Coffee break	
14:15	Thao Le	Community Structure in Markov Influence Graphs with Heterogeneous Holding Times
14:30	Kieran Murray	Optimal disease mitigation with endogenous network response
14:45	Sanna Stephan	Moment Base Estimation of Information Diffusion in Networks
15:00	Mark Thissen	Reverse Engineering Deglobalisation; Consequences for Dutch regions
15:15	Mark Lijesen	Airline Price Responses, Flight Characteristics and Network Characteristics
15:30	Gert Buiten	The Dutch firm-level supply chain network: recent developments
15:45	Simon Trimborn	Influencer detection meets network autoregression - Influential regions in the bitcoin blockchain
16:00	Rein van Alebeek	Scaling up Interacting Systems: A Powerful New Approach
16:15	Coffee break	
16:30	Michael Koenig	Collaboration in Bipartite Networks
16:45	Milan Makany	Connections in Academia
17:00	Dominika Czerniawska	Dum duo litigant, tertius gaudet? Dynamics of Global Collaboration Network in Nuclear Fusion
17:15	Michiel Gerritse	Careers in Multinational Enterprises
17:30	Rene van den Brink	Degree centrality, von Neumann-Morgenstern expected utility and externalities in networks
17:45	Drinks
